

SYDNEY KAITLYN M. PUA NG

Tech Virtual Assistant | AI & Automation Specialist

Philippines | sydneykmpn@gmail.com | +63 917 705 9448

PROFESSIONAL SUMMARY

Technical Virtual Assistant specializing in AI-powered automation and workflow systems using n8n, Zapier, and Make. I design practical, end-to-end workflows that help teams reduce manual work, improve communication, and streamline operations.

Experienced in building AI-assisted systems for lead management, content automation, and internal workflows, with a strong focus on simplicity, reliability, and real-world business use.

CORE SKILLS

CORE SKILLS

- AI Automation & Workflow Design
 - n8n, Zapier, Make (Integromat)
 - API Integration & Webhooks
 - CRM Automation & Lead Pipelines
 - Data Processing (CSV, Excel, scraping)
 - AI Agents & LLM Integration
 - Process Optimization
 - JavaScript & Python
 - Database Management (PostgreSQL)
-

KEY PROJECTS

AI & AUTOMATION PROJECTS

AI Lead Processing & Outreach System (Zapier + Gmail + Google sheets)

- Built real-time lead intake system using webhooks and AI enrichment
- Applied scoring logic to prioritize high-value leads for faster decision-making
- Generated personalized outreach messages to improve engagement and response rates

AI Appointment Setter (n8n)

- Developed automated system for handling inquiries and scheduling appointments

- Reduced manual coordination through structured response and booking logic

AI Agent for Facebook Messaging (n8n)

- Created AI chatbot using LLM integration to respond to customer inquiries
- Connected memory and external tools for more contextual and accurate responses

CRM & Lead Automation Pipeline (Zapier + Asana)

- Designed automated workflows for lead follow-ups, onboarding, and nurturing
- Improved response consistency and reduced delays in lead handling
- Integrated multiple tools to centralize communication and task management

AI Content Automation System (Zapier + AI)

- Built system to generate and distribute content across Facebook, LinkedIn, and Instagram
- Reduced manual content workload and ensured consistent posting
- Implemented scalable logic using filters, loops, and multi-path workflows

Financial & Data Automation (Make + Xero + Asana)

- Automated extraction and transformation of financial reports into structured data
- Reduced manual data handling and improved reporting efficiency

Email & File Automation System (Make + Gmail + Drive)

- Built workflow for automatic email attachment sorting and file organization
- Reduced repetitive admin work through filtering and routing logic

AI Job Scraper & Resume Optimizer (n8n)

- Developed workflow to scrape job listings and analyze requirements
- Used AI to tailor resumes based on job descriptions

Automated Short-Form Content System (n8n)

- Created end-to-end content pipeline from generation to publishing
- Improved content consistency and reduced manual effort

TOOLS & TECHNOLOGIES

Zapier, Make, n8n, OpenAI, Gemini, Claude, Webhooks, Google Workspace, PostgreSQL, GitHub, Canva, Excel

AI & KNOWLEDGE SYSTEMS

- Experience using LLMs (OpenAI, Gemini) for structured outputs (emails, summaries, responses)
- Designed prompt templates for consistent and high-quality AI outputs
- Familiar with building centralized knowledge workflows for team use

CERTIFICATIONS

- No-Code Automation with Zapier (2026)
- No-Code Automation with Make.com (2026)
- AI Automation with n8n (2026)

EDUCATION

BS Computer Science - University of the Philippines Manila
